#Solution2020-Future Proof Infra

Welcome to Unique Open Infra Hackathon 18-20 November 2020

Construction productivity has been low for a long time competing to other industry. At the same time it is in the middle of a dozen demands: environmental efficiency, the cost efficiency and the more demanding end-user requirements.

To tackle these challenges we have to find out new ways to do things. Today technology and a new way of collaboration offers a great opportunity for this. We need new ideas, innovations and solutions outside of the construction business to solve these challenges. Potential is huge for all of us.

Participants have 40 hours time to solve challenges of infrastructure construction.

Join us as a participant, partner or mentor!

WHY PARTICIPATE

Fast track to success. #Solution2020 combines global hackers, startups and companies and creates unique innovative solutions.

WHAT YOU GET

Leading industries and public sector organizations present their challenges to hack. Kick off your project and continue to the 40-hour hackathon event. Or follow the hacking and see the unique results as a partner.

TO WHOM

HACKER and STARTUPS

We invite you to test your limits - Join an intensive coding marathon or jump into unknown as you take a chance at developing your dream project.

JOIN AS A PARTNER

#Solution2020 has the potential to solve burning challenges. Bring in your technology and expertise and see what are we capable of. #Solution2020 increases your visibility and possibility to network with the most talented global developers. You also gain access to all #Solution2020 results!
